HR Attrition

Which retention programme would keep the most people? · IBM HR data (fictional), 1,470 staff

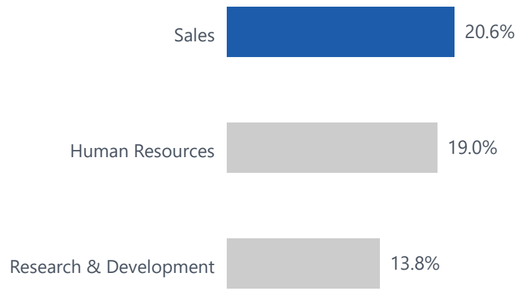

Department: All

Gender: Female | Male

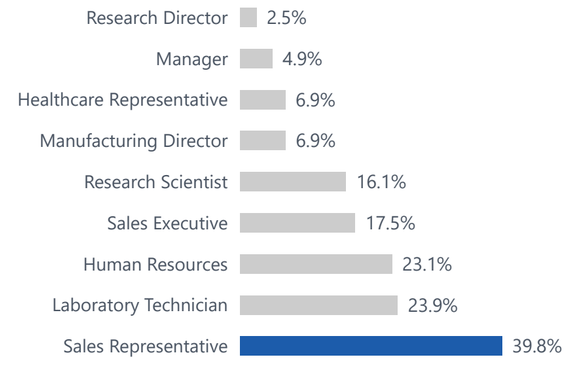

Age band: All

Employees	People Who Left	Attrition Rate	Average Monthly Income	Avg Tenure
1,470	237	16.1%	6,503	7.0

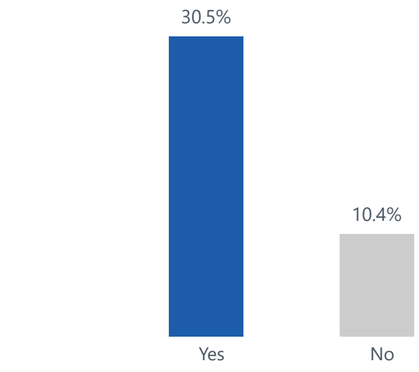

Sales loses 1 in 5 people, against 14% in Research & Development

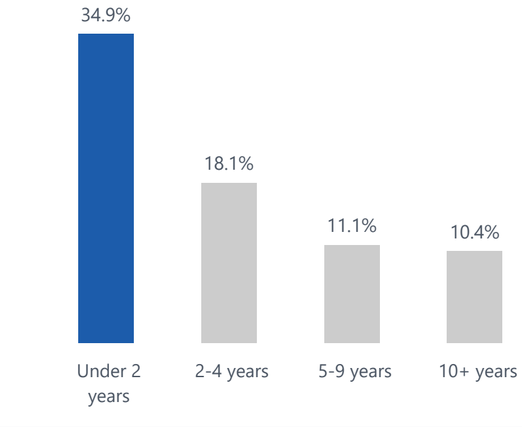

Sales Representatives leave at 40%, more than double the company rate

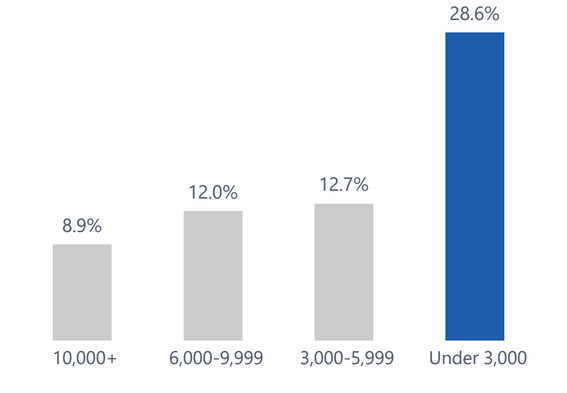

People on overtime leave three times as often: 30.5% against 10.4%

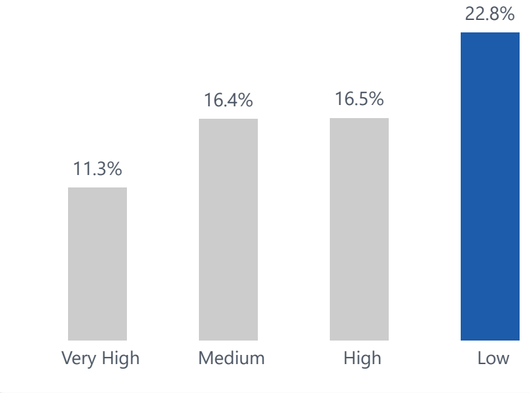

35% of people in their first two years have left

The lowest-paid leave most: 29% of those under 3,000 a month

Low job satisfaction doubles attrition: 23% against 11%

Verdict

One in six people has left: 237 of 1,470, or 16.1%. Leaving is concentrated among people on overtime, the lowest paid, and new starters.

Recommendations

Overtime: 416 people leave at 30.5%, against 10.4% for everyone else. Up to 84 fewer leavers.

Pay: 395 people under 3,000 a month leave at 28.6%. Up to 67 fewer leavers.

First two years: 215 new starters leave at 34.9%. Up to 47 fewer leavers.

Our pick: cut overtime. It reaches the most people and has the biggest possible gain.
